

BAPTISMAL EQUIPMENT BY WATER STRUCTURES

Professional Equipment Packs for Custom Designed Baptismal Fonts

Water Structures specializes in custom designed equipment packs. The equipment and plumbing design is sized to meet the needs of a particular job. All Water Structures packs are factory built and water tested before shipping.

COMPLETE SYSTEMS

Each equipment pack comes with everything you need to install and operate the pack, including:

- Installation CAD drawings for the plumbing and wiring of the packs.
- Quiet run high quality water feature pumps, properly sized for the job.
- Odorless UV Germicidal water purification systems which kill viruses and gems.
- Pre wired controller.
- Factory water testing.
- Care and maintenance kit with CD and operational instructions.
- Continuing installation and operational support by Water Structures.
- Two year limited parts replacement warranty.

EXPERIENCE

Water Structures has twenty years experience providing the design professional with design consultation, installation drawings, continuing customer service.

Water Structures can provide miniaturized equipment packs for specialized needs, such as was required for the font at St. Bonaventure, Detroit, pictured above, where the equipment is located under the upper bowl.

Water Structures specializes in equipment packs for all types of baptisms, including:

1. Negative edge, (infinity) systems.
2. Auto fill/auto drain system.
3. Hidden inlet/outlet systems
4. Multi level /multi spillway systems.
5. Water wall/water fall and living water displays
6. Single outlet recirculation systems.
7. Drain down systems
8. Miniaturized baptismal packs often used under small baptismal bowls
